THE PRAISE AND PROPERTIES OF A GOOD WIFE

“She is like the merchants’ ships; she bringeth her food from afar.”

“She riseth also while it is yet night, and giveth meat to her household.”

“She considereth a field, and buyeth it: with the fruit of her hands she planteth a vineyard.”

“She stretcheth out her hand to the poor; yea, she reacheth forth her hands to the needy.”

“She looketh well to the ways of her household, and eateth not the bread of idleness.”

“Her children arise up, and call her blessed; her husband also, and he praiseth her.”

“Many daughters have done virtuously, but thou excellest them all.”

PROVERBS XXXI,

INTRODUCTION

DO not suppose we “Dorcases” fancy that the world is waiting for another cookery book, nor that we believe we are supplying a long-felt want with this little pamphlet. One could have no illusions on that subject when the monthly and weekly magazines, and even the daily papers, have pages in every issue devoted to recipes, together with columns upon columns of suggestive bills of fare. Everybody reads these regularly, remarking to the person sitting near: “That sounds good!” “I must paste that in my book.” “Let’s try that some time.” My private opinion is that we need cooks much more than books, and that one housekeeper who will experiment on appetizing novelties is worth a dozen of those who buy books, cut out, pin up, paste in, and hoard recipes, but continue to serve their families with the same dishes they used when they began housekeeping.

This modest volume does not aim to be a complete compendium of scientific cookery nor a practical guide to the young housekeeper; neither can we claim for it any startling originality. It has been compiled because we have many enterprises in hand for which we need money, and we believe the book may be one of the ways in which we can fill our treasury. But although we disclaim all intention of surprising

and instructing the culinary world, and avow our hope of financial profit, we take honest pride in our little book, as we do in all our endeavors, large or small. Every dish in it has been made hundreds of times by the particular Dorcas whose name is attached to it; but I sometimes think Dorcas should accompany her own recipe and stand over it until it is cooked and eaten, for the cake labelled "Delicious" sometimes turns out a sorry failure in your opposite neighbor's kitchen. There is a hard hand and a light one in cooking as well as on a horse's rein, and it almost seems as if butter and eggs knew their mistress and instinctively obeyed her orders, feeling themselves in the grasp of a superior power.

"Oven-judgment" never comes to some women in the course of their lives (and we certainly hope that they will feel no need of it in another world!) nor does the faculty of deftly combining the necessary ingredients. The terms "stiff," "thin," "hard," "soft" are very flexible and depend on the cook's point of view, while the art of perfect seasoning and flavoring is all too seldom attained.

Women are largely in the majority in New England, and because that is so it follows necessarily and naturally that they should take a considerable share of civic as well as domestic responsibility.

In church, school, garden, and farm work we women are as much needed as in the home, and we shall never be able to make our vil-

lages pleasant and prosperous places to live in, nor provide the proper environment for the younger generation unless we apply ourselves earnestly and intelligently to the task.

The cooking in small hotels and boarding houses along our countryside does not compare with that in England or on the Continent, and we are constantly criticised for the small amount of nourishment and large amount of dyspepsia with which we furnish our farming and laboring classes.

The devising of a good liberal diet, simple but varied, is one of the most important ends to which the mistress of a household can devote her energies. Is Dorcas doing all she might in this matter? How can we inspire and help our brothers, husbands, fathers to bring back the old garden to its once noble estate? Where are the rows of currant and raspberry bushes we used to see at the side or back of the house? We need not raise small fruits for the market if we lack time or strength, land or labor, but how about raising things for the family and the growing children?

When I was a girl there were always a few black and red currant bushes in the garden, with blackberries, raspberries, or strawberries. There was a single pear, or crab apple, quince, or plum tree in the orchard, and a Concord grape-vine over a porch. Citron melons were grown then, and there was a barberry bush planted by the kitchen door; and what delicious preserves for the long winter came from

those quince and apple trees, those citrons and damsons and pomegranates! Green and ripe tomatoes helped to swell the list, and mother had only to buy lemons and sugar and ginger to fill the goody-cupboard to bursting. Home-made jellies and jams mean a few days in a hot kitchen, but what comparison is there between these, with their pure, wholesome fruit juices, and the gelatine-laden products of the shops?

How shall we make the table more attractive, the food at once more appetizing and nourishing? How, especially, can it be done when the mistress of the house is a mother of children, having, with a little help, or with none at all, to take care of washing, ironing, sewing, mending, as well as cooking? Only a woman of good health, rare common sense, great patience, and fine spirit can compass this daily round of duties successfully; but it is a very beautiful, even a splendid thing when it is compassed!

A palatable meal, a well-set table, a family with keen and appreciative appetite, good digestion, hearty, healthy children with pleasant table manners, and a general feeling that mother is the very best cook in the universe! These read like humble things, but their sum total is probably one of the greatest factors in useful and happy living.

Any one who has a general helper or a servant can easily manage spotless table linen, changes of plates, service in courses, flowers, and all the accessories that go to make up a dainty meal; but how shall the tired woman who has been on

her feet all day keep strength and ambition enough to preserve the *niceties* of life when she is completely worn out with its *necessities*? It cannot always be done, — that might as well be confessed at the outset. There are days of constant interruption, of illness, of discouragement, of exhaustion, when things are dropped wearily on the table, and the children are allowed to eat in confusion and hurry and disorder. But this is only occasional, and any woman who loves and seeks after beauty — beauty of cleanliness, freshness, order, refinement, harmony, punctuality — will manage to attain it at least a fair portion of the time. Every home in which this sort of modest unostentatious beauty is present is a lighthouse to the surrounding country. Every housekeeper who can be clean without being “p’ison neat,” energetic without being a “bustler,” a good cook without being too extravagant, hospitable, yet keeping strength for her own family, — such a woman is as much an inspiration to the community as she is to her own household.

Our Dorcas Society has held many unspoken ideals these last busy years. It has not only held them but it has worked for them. We want our little group of villages on the brink of the river to hold up their heads and wax strong. We want our district schools to improve from year to year; our buildings to renew their paint and shingles; our farms to thrive; our Village Improvement societies to prosper; our churches to grow; our roads to be bettered;

our new Library to be an influence in its modest way.

We are helping to build a new Parish or Community House where boys' and girls' clubs can meet; where gatherings of many sorts can be held, and such lectures and entertainments as are appropriate to a small audience room; where also the social hospitalities of the church can be dispensed with comfort and dignity.

Many of our young people will go away in search of larger opportunities and gains, but we shall always have them during the formative years of life, and we want to send them out into the world so equipped that they will be a credit to the place of their birth.

This Dorcas Fair of August, 1911, is one of our annual attempts to earn money for worthy causes. The Book of Dorcas Dishes will be a souvenir of our hopes, our ambitions, our courage, and our faith. It will voice our belief in the value of good housekeeping and good cookery, which indeed are real civic virtues.

When you try one of our simple recipes remember that you have added your mite to a fund that will be used for all sorts of fine purposes, broad and unsectarian ones.

We have purposely included very simple dishes; just the plain, daily diet of a band of country Dorcases, with a few pretty things we cook when an old friend graces the supper table, or company comes from Boston, or John brings home his bride. Let us sum it all up. Good cooking needs skill, judgment, and imag-

ination, therefore it tests the qualities of the cleverest woman. Nobody pretends that dish-washing is attractive, and nothing but Christian grace makes us endure the pots and pans, but cookery is high art; let us think of it as such, and we shall be properly proud of such triumphs as we achieve. Who would not rather make a delicious strawberry short-cake than play *The Maiden's Prayer* on the piano? Where is the painted table-scarf that can compare with an honest loaf of milk-white bread? Is a bunch of wax or paper flowers any more artistic than a ball of perfect butter stamped with a garland of daisies? No; there is genius in a wonderfully seasoned dish of meat or fish, in a toothsome sauce, or in a clever arrangement of "left overs." There is real poetry in a shining country kitchen; poetry in bread and cake as light as a feather. Would that a little of it, felt by some Dorcas as she stirred and kneaded and measured,—would that a little of it might be imprisoned in this text, and find its way into another woman's heart in some other country kitchen.

MEAT DISHES

Veal Loaf

(Mrs. H. E. Bradbury)

3 lbs. upper part of leg of veal, chopped fine.

¼ lb. of well-selected salt pork, chopped fine.

2 eggs, well beaten.

1 cup powdered crackers.

1 teaspoonful salt.

1 teaspoonful pepper.

1 teaspoonful sage.

All to be mixed up thoroughly and baked in a bread pan for 1 hour and 10 or 15 minutes.

Hamburger Roast

(Mrs. Ira Libby)

2 lbs. of the bottom of round steak, put through meat chopper.

¾ cup milk.

2 well-beaten eggs.

Good ½ cup rolled cracker crumbs.

½ cup melted butter or bacon fat.

Salt, pepper, and poultry dressing to taste and 1 onion, if desired.

Mix well and shape, then dredge well with flour. Put small pieces of butter on top and bake in good oven 1 hour. Baste well with butter or bacon fat. Make gravy.

Pot Roast

(Mrs. John Guilford)

Melt in a hot frying pan a lump of butter; or fry out a small piece of pork; while very hot put in the roast, browning all sides. Roll it over; do not insert fork, so as to keep all juices in. When browned, put in a pot which has been heated; put water in the frying pan to get any juices that have escaped, and pour over meat. Cover closely and cook slowly 3 hours, turning occasionally. Keep about a cup of water under the meat and sprinkle a little flour and salt over the meat 15 minutes before taking out, and turn several times. Browned potatoes are very nice with this meat: Boil potatoes whole until nearly done; drain, roll in flour, take meat out and put in potatoes in the gravy in the pot, until browned somewhat. Take the potatoes out and place in a hot oven while thickening the gravy and they will crisp over and are very nice.

Dorcas Hash

(Mrs. James Woodman)

Cut cold cooked beef or mutton into small bits, re-heat in gravy or in a sauce made of butter, flour, and water in which a little beef extract has been dissolved. Season with salt, pepper, and grated onion, if you choose. Fill a buttered baking-dish two-thirds full. Cover the top with seasoned mashed potato made very light with the white of an egg beaten to a stiff froth. Bake in a hot oven until the potato is well puffed and brown.

Baked Sausages

(Mrs. Samuel Chase)

Prick the sausages with a fork and bake for 6 or 7 minutes in a hot oven; take 3 cups of mashed potatoes and whip it with a well-beaten egg; lay this on a baking dish with the sausages on top, and cook 6 minutes longer.

Chicken a la Dorcas

(Mrs. Margaret Lord)

Cut up a tender chicken. Season with salt and pepper, dip in egg and crumbs, and arrange the pieces close together in a buttered baking-pan. Dot each piece with butter, cover with another dripping-pan, and bake in a hot oven until brown. Make a cream sauce and scrape the crumbs, butter, and bits of chicken which will stick to the baking-pan into the sauce. Pour the sauce over the chicken.

Potted Chicken

(Mrs. Norton Libby)

Cut up a chicken as for fricassee and to each pound of meat allow 2 tablespoonfuls of flour, $\frac{1}{2}$ teaspoonful salt (very scant), and a dust of pepper. Mix thoroughly and roll each piece of the meat in the mixture. Pack closely in a large bean pot and cover with boiling water and bake $3\frac{1}{2}$ hours. Cover after 10 or 15 minutes, but not before it boils.

Beef and Tomato Stew

(Mrs. Gibeon Bradbury)

1 cupful lean, uncooked beef, chopped fine.
1 $\frac{1}{2}$ cupfuls strained tomato juice.

4 to 6 slices dried toast.

1½ tablespoonfuls butter.

1½ tablespoonfuls flour.

1 tablespoonful finely chopped onion.

1 teaspoonful salt.

¼ teaspoonful pepper.

Melt the butter, add the onion and cook until slightly colored; put in the meat, packing it down solidly. Cook, without stirring, until it begins to brown around the edge, then turn (it will break, but this does not matter) and cook until almost dry. Put the tomato juice, salt, and pepper into an agate ware sauce pan, and bring to boiling point. Mix the flour well with the meat, turn into the tomato juice, stirring until it boils and thickens. Pour out on the toast and serve hot.

Second-Day Roast Beef

(Evelyn Dutton Fogg)

Cut the lean meat of the cold roast beef into small squares, removing any fat or tough parts. Take a quart, or a pint of stewed tomatoes, according to the quantity of meat. Boil ¼ pound of macaroni in water until tender, then drain. Add left-over gravy to the tomatoes. Put into a baking dish alternate layers of macaroni and meat, pour in the tomatoes and gravy, cover the top with fine bread crumbs and bake in the oven until the crumbs are well browned. The proportions depend upon the amount of meat, and additional gravy may be had by boiling the scraps in a little water, seasoning and adding to the tomatoes.

Rolled Beefsteak

(Mrs. John Guilford)

Take a round steak, beat it well and spread it with a dressing such as is used for poultry. Begin at one end and roll it up neatly, trying to keep it in shape. Put it in a bake-pan with a little water, and bake until the meat is tender, basting it frequently, and when nearly done put a tablespoonful of butter over it. Thicken the gravy in the pan with a little flour and season well. Cut the meat as you would a berry-roll, slicing off the ends neatly.

Chicken a la Maryland

(Mrs. Austin G. Gorham)

Cut your chicken as for frying. Wash, and dry in a cloth; then dip chicken in either melted butter or fat from fried pork. Salt and pepper the pieces, then roll them in cracker or bread crumbs; put in baking pan, in two layers, baste with melted butter and part water (or baste with pork fat, if used). Bake till thoroughly done, then place chicken on hot platter and cover all with thickened gravy, unstrained.

Dumplings

(Henrietta Elden)

For every cup of flour use 1 heaping teaspoonful baking powder, 1 small teaspoonful salt. Use milk to stir as stiff as possible with a strong spoon, leaving a little dust of flour that is not mixed in. Dip the spoon in the stew, then in dough, cutting off small pieces not larger than a

FOR WRITTEN RECEIPTS

hen's egg, as they expand to twice their size. Lay around on top of stew, then draw the pan they are cooking in back on top of stove, so they will not burn, keeping just boiling slowly. Leave the cover off until the dumplings are like puff balls, then put the cover over them until they are cooked, which will be about 20 minutes.

Mexican Stew

(Mrs. Austin G. Gorham)

1 slice round steak (about 1½ lbs.).

6 beets.

6 turnips.

6 onions.

6 potatoes.

6 peppers (large, sweet, green).

6 tomatoes.

Put steak in bottom of pot, then add the beets and turnips, and cover all with boiling water, and add water as it cooks away. After these have cooked 3 hours, add the potatoes, onions, and peppers (removing part of the seeds from the peppers, or it will be too hot), and cook 1 hour. Then add the tomatoes and cook 20 minutes. Thicken with flour (mixed with a little cold water), season to taste. Cook slowly all through on top of stove.

III

FISH DISHES

Quillcote Codfish Pie

(Nora A. Smith)

Line a dish with 2 crusts of puff paste and bake. Remove upper crust and fill with codfish prepared as follows: Flake and freshen 1 strip of codfish and cut an onion in bits, cooking in water until done. Let 1 cup of creamy milk come to a boil, thicken with flour, add fish and onion and small piece of butter. Serve hot.

Creamed Fish on Toast

(Mrs. William Deering)

Haddock or any white fish, cold water to cover.

1 pt. milk.

1 tablespoon butter.

2 heaping tablespoons flour.

$\frac{1}{2}$ teaspoon salt.

Pinch of pepper.

1 tablespoon chopped parsley.

Wash the fish well. With a very sharp knife cut off the best of the flesh, commencing along the line of the back where the dorsal fins have been removed and cutting both ways. This may be saved for frying. Boil the remaining fish and bones, in cold water enough to cover,

until done. Remove bones and skin. Add milk, let come to a boil and then add the flour moistened with a little cold water. When thickened, season with salt, pepper, butter, and parsley, and serve on toast.

Baked Halibut

(Sarah D. Moulton)

Take 2 slices of halibut 1 inch thick; between them put cracker crumbs, pepper, salt, and fat pork chopped fine; put the same on top, using butter instead of pork. Bake in a small pan set into a larger pan of water. Bake till the crumbs are brown, basting frequently with the drippings.

Clam Chowder

(Mrs. Thomas L. Kimball)

1 qt. clams. Separate the belly from the other part, and cut off the black heads. Have ready some fried pork scraps, some split crackers, sliced raw potatoes, and onions. Put a layer of clams, a layer of crackers, a layer of potatoes, and onions, with pepper and salt on each layer. Cover with hot water and boil until potatoes are done. Then add two quarts of milk.

Salmon Souffle

(Mrs. Emery Harriman)

2 level tablespoons butter.

2 level tablespoons flour.

1 teaspoon salt.

$\frac{1}{4}$ teaspoon paprika.

1 pt. milk.

- 1 cup stale bread crumbs.
- 1 teaspoon onion juice.
- 1 teaspoon chopped parsley.
- 1 teaspoon lemon juice.
- 1 pound cooked salmon.
- 3 eggs.

Prepare a sauce with the butter, flour, seasoning, and milk; add bread crumbs, yolks of eggs well beaten, onion juice, lemon juice, parsley, and salmon rubbed fine with a silver fork. Then fold in whites of eggs beaten dry. Turn mixture into buttered baking dish and set this into a dish of hot water. Bake about 25 minutes in a moderate oven.

Escalloped Oysters

(Mrs. W. S. Moulton)

- 1 pt. oysters.
- 8 common crackers.
- $\frac{1}{2}$ cup water.
- 1 cup milk.
- Piece of butter size of an egg.
- Pepper and salt.
- Butter a baking dish; sprinkle the bottom

with cracker crumbs, then have a layer of oysters, then cracker crumbs. Moisten with milk, butter, proceed till dish is full, having cracker crumbs on top. Bake in a hot oven 30 minutes.

Codfish Balls

(Mrs. Oland Trask)

To 1 cup of boiled codfish chopped fine add 2 cups or more of mashed potatoes. Moisten with 1 beaten egg, or 2 or 3 tablespoons of sweet milk. Season with pepper and a little butter.

Make small flat cakes, flour, and fry a delicate brown in hot dripping or lard. A more delicate dish is made by dipping the cakes in beaten egg, then in bread crumbs and fry as above stated.

Salmon Pie

(Mrs. Perley A. Berry)

2 small cans salmon.

4 eggs.

1 cup macaroni.

Open salmon, pick out bones and skin; cook macaroni in boiling salted water $\frac{1}{2}$ hour; boil eggs until hard, peel and cut in halves. Line a 3-qt. baking pan with puff paste.

Wet edges of pan after being lined, then put in the salmon, eggs, and macaroni in order named.

Lay in 3 crackers split.

Pepper and salt, a little onion if liked, $\frac{1}{4}$ lb. butter, or a butter gravy poured over the whole, and fill $\frac{2}{3}$ full. Cover with crust rolled out $\frac{3}{4}$ in. thick.

Codfish Foam

(Mrs. Chas. Earle)

Make a white sauce of 1 tablespoon of flour, 1 teaspoon of butter, and 1 cup of hot milk. Stir until smooth, then add 2 tablespoons of finely picked codfish, freshened, and the beaten whites of 2 eggs.

Fish Croquettes

(Mrs. Guy L. Hall)

Chop finely cold cooked fish. To each cupful add 1 large cracker rolled to a powder, 1 well beaten egg, 1 tablespoon of milk, and pepper and salt to taste. Fry in butter until nicely browned on both sides and allow 1 small tablespoon for each croquette.

Browned crumbs.

keep the mixture from crumbling. Press this into the inside of the fish, into the space just under the head where it is not open. Skewer or sew the edges together to keep in the stuffing and truss the fish in a circle by pushing the tail through the eyes. Next rub the fish all over with flour to dry it. Beat up the egg and paint the fish all over with it, then entirely cover with some nicely browned crumbs, so that it looks like a fried haddock.

Put the fish in a baking tin with the dripping. Bake in a moderate oven about 10 to 15 minutes. Baste it frequently, lift out of tin and remove skewer or stick. Serve on a hot dish with anchovy or butter sauce round.

MISCELLANEOUS

Canned Tomatoes

(Mrs. Charles Nichols)

Remove the peeling from the tomatoes and place as many as possible in a jar. If required to cut them in two, do it down through instead of across. Put covers on jars, but do not snap them down. Place jars in steamer and cook until the top of the jar is too hot to place your hand upon it; remove the cover and fill with boiling water; see that all the air is out, and seal. Place jars in an earthen crock and pour enough boiling water in to come up around the neck of the glass jars and let them stand until cold. A pinch of salt added to each jar improves the flavor.

TO A DORCAS DAUGHTER

(Kate Douglas Wiggin)

IF any member of the family has a few minutes a day in which to gather a few flowers for the supper table, you are the one, whether you are twenty years old or whether you are only ten. If you are still going to school, you may be able to get something every afternoon on your way home; for there is scarcely a week, from the time when the dandelions blow, to the day when the trees are bare and the ground is frozen, when you can not find something lovely by the wayside, in the fields, or in the woods.

If you can do "button-hole stitch," you can make a colored edge on a circle of linen for a small centre-piece. You can make a pretty effect also by putting three or four rows of feather-stitching inside the edge; or failing anything else, you can feather-stitch a few ready-made doilies with different colors and have one to match any nosegay.

If you have a family garden, all is easy from June to October; but if you have not, God has been just as good to the poor as the rich in the matter of flowers, and the busiest country child has just as much within her reach as a princess with a conservatory. I give you here a few suggestions about making a little daily decoration for the table. There is not a flower you

do not know, nor one you have not often gathered. You would put them together yourself in just the same way, perhaps; but somehow, when a thing is printed in black and white it looks like a letter written directly to you! You stop and think: "Why did I never do it? It is easy; it is pretty; mother and father will like it." You will stand up on a chair to look on the top shelf of the closet and find a glass finger bowl, or a wine glass, or a lemonade cup, or a spoonholder. You will see what vases there are in the house and what mother will allow you to use. As the days go on you will search for some new growing thing; you will invent and combine and scheme to get a novel effect. Some one in the family will notice how you arrange flowers and leaves and grasses, and you will do them more and more beautifully as time goes on, using long stems and putting them together loosely and naturally, as Mother Nature does.

Then what will have happened? Only this. You will have developed a new love of beauty, for you will have learned to produce it. You will have used the "thinking part" of you; you will have devised and combined and invented; in a word, you will have become an artist!

It is rather a nice thing to be, — a decorator of the farmhouse, the church, the village school! Perhaps they will beseech you to do something for the Town Hall later on. Who knows? "Tall oaks from little acorns grow."

Meantime, as you are passing the parlor door

where your mother is talking with a visitor you may hear something like this :

“ Yes, our Emily has a great knack with flowers. She took a bean pot for a vase when she put that goldenrod in the fireplace, but after all it looks pretty on the brick hearth. . . . That bunch of black-eyed Susans on the table is in one of my cooking bowls. Emily says this room is so gloomy she always wants to light it up with yellow, but the sitting-room is full of sunshine and she generally gives me something green in there. . . . Yes, it’s a wonderful comfort, now that I am too lame to get away from the house, to have Emily bring all outdoors in to me, and she is only fourteen. . . . She has so much ingenuity! Last night was her father’s birthday. We had nothing extra for supper, for a long illness in the house uses up money faster than anything else and we have to be economical. . . . Well, she took an old gold-fish globe that the doctor’s wife gave her, and filled it with sprigs of autumn leaves and then she scattered the handsomest ones over the cloth and tied a great red bunch on her father’s chair. As he looked in the dining-room door he caught sight of the table and guessed it was some kind of an ‘occasion.’ Then he remembered it was his own birthday, gave an extra brush to his hair, and put on his second-best coat. I was n’t going to be outdone, so I put a couple of purple asters on my plate of baking-powder biscuits and a sprig of green on each end of my platter of corned-beef hash.

. . . John, my oldest boy, is about sixteen, and he used to make fun of his sister's way of 'dressing up victuals,' — that is what he called it; — but he never does it any more; he says that we all kind of 'live up to' Emily's flowers now-a-days."

When you have heard this, if you are a good Dorcas daughter, your heart will be glad. Perhaps in order to "live up to" your own flowers you will take extra trouble in sweeping and dusting and arranging the furniture to the best advantage. Remember, mother carries the heaviest burden, day after day and year after year. You can lighten it, of course, by industry and helpfulness and cheerful companionship, but you can do it still further if you can aid in creating and maintaining the "Home Beautiful."
